DETAILED ACTION¹

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 144-148, drawn to a semiconductor device including a monocrystalline compound semiconductor layer overlying a region of a first monocrystalline semiconductor layer, classified in class 257, subclass 183.
 - II. Claims 149-156 and 158-162, drawn to the semiconductor structure of invention I in combination with a monocrystalline metal oxide buffer layer interposed between the semiconductor layer and the compound semiconductor layer, classified in class 257, subclass 190.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination does not require an electrical interconnection (see claim 146). The subcombination has separate utility such as in a device wherein the two semiconductor layers are wafer-bonded directly together without an intervening buffer.

¹ Please note the "Allowable Subject Matter" section following the restriction requirement.

Art Unit: 2815

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Allowable Subject Matter

6. If elected, claims 149-156 and 158-162 would be allowable subject to an update search and the filing of a proper terminal disclaimer. The examination of claims 144-148 would require further consideration and search because at least claim 144 is so broad that it provisionally appears to read on well-known subject matter such as (1) a GaN-based LED mounted on a SiC substrate, which in turn, includes a Zener diode integrated therein; or (2) a Si substrate that includes a SiGe(C) region formed thereon or therein.
